MATH GLOBAL Education

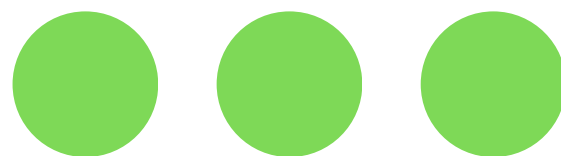

Mathematics is most liked subject for only 6% and it is the least liked one for 88% of students.

Mathematics is a unique subject that is the fundamental part of every school curriculum and the essential instrument for the development of all other sciences. Knowingly or unknowingly, we are using mathematics in every day life.

MGE proudly offers more **customized, conceptual** and **observational** math classes that focus on math understanding rather than memorization.

Many factors lead to “math anxiety” and difficulty in understanding math, which results in staying away from math related subjects and careers. This negatively affects students’ perseverance, goal orientations, interest, expectancy and task values, and even perception about the ability to reach their own goals. Reach your full potential and achieve all your academic goals with MGE.

Your Math Tutor!

Welcome to Math Global Education

Mathematics is considered the most challenging class by students due to difficulty in following the instruction and truly understanding the concept. Students rely on remembering math equations and ways to solve problems to succeed, while they actually require ***the firm foundation, observational*** and ***conceptual*** classes to really understand math concepts in order to avoid memorizing them.

Every class is personalized to student's unique needs

Since 2001, MGE has partnered with 1000+ students across Canada and globally to unlock their full potential by developing math skills and study habits that will guide them towards all their academic goals. We have observed that students need tutors that are familiar with the Canadian school curriculum and study habits necessary to succeed in the Canadian academic environment. MGE tutors, educated at Canadian high schools and universities, are experienced and dedicated.

We make sure your grades are really great in school

The content is too hard or not challenging enough, the language barrier, not enough time or not finding the right tutor to successfully engage students in their progress, are just some of the reasons why these classes are in very high demand. MGE students have great opportunity to complete their daily homework and prepare for exams, while learning lessons conceptually and taking the right approach to practice, therefore improve and advance. At MGE, we always review related topics from previous grades, connecting it to the current lessons and expanding it to advanced level in order to create complete understanding of the topic.

Online classes:

3+ classes/week: \$40/hour

Grade 1-9: Math, English, Science, Social Studies, French & more

GRADE 6-9 AFTER SCHOOL GROUP CLASSES
